Detailed descriptions with custom column widths

Detailed Description	Category	Priority	Status
comprehensive user authentication system with multi-factor support, password	Development	Medium	In Progress
d develop RESTful API endpoints for all user management operations including	Testing	Low	Completed
ailed technical documentation for the entire system architecture, covering data	Deployment	High	Blocked
atabase query performance by implementing proper indexing strategies, query	Maintenance	Medium	Pending
utomated testing suite covering unit tests, integration tests, and end-to-end test	Documentation	Low	In Progress
real-time data synchronization across multiple client devices using WebSocket	Development	High	Completed
onsive user interface components with comprehensive accessibility support and	Testing	Medium	Blocked
tinuous integration and deployment pipeline with automated testing, code quali	Deployment	Low	Pending
ecurity audit and implement necessary security measures including input valida	Maintenance	High	In Progress
d implement scalable microservices architecture with proper service discovery,	Documentation	Medium	Completed
comprehensive user authentication system with multi-factor support, password	Development	Low	Blocked

emonstrates **custom column width specification**.

umn has a fixed width of 400 units for long descriptions.

ns have smaller fixed widths as appropriate.
